

PROJECT SCOPE STATEMENT

Project Name	BookExchange
Project Deliverables	
Home Page (index.html)	Landing page with welcome message, explanation of the platform, and navigation to Browse Books and Post a Book features.
Post Book Feature (post.html)	Form allowing users to create a book listing by entering title, author, course code, condition (dropdown), price, email, and phone number. Includes validation and saves to LocalStorage.
Browse Books Feature (browse.html)	Grid display of all available book listings showing title, course code, condition, and price. Only shows books with 'available' status (not sold).
Search Feature (browse.html)	Search bar allowing case-insensitive filtering of books by title or course code. Results update dynamically based on search input.
View Details Feature (details.html)	Detailed view of a single book showing all information including seller contact details (email and phone). Includes Mark as Sold and Delete buttons.
CSS Styling (style.css)	Responsive stylesheet providing consistent design across all pages, including grid layouts, form styling, buttons, and mobile compatibility.
JavaScript Functionality (script.js)	All application logic including data storage/retrieval from LocalStorage, form handling, search filtering, display functions, and status updates.
Project Exclusions	
The following features are explicitly OUT OF SCOPE for this MVP: • User accounts and authentication system • In-app messaging between buyers and sellers • Payment processing or transaction handling • User ratings and review system • Push notifications or email alerts • Backend server or database (using LocalStorage only) • Image upload for book covers • Advanced filtering (by price range, condition, department) • Saved favorites or watchlist • Digital textbook exchange
