

STAKEHOLDER ENGAGEMENT PLAN

Project Name	BookExchange	
Name	About the Stakeholder	How to Engage
Student Sellers	Students who have completed courses and want to sell their used textbooks. They need a better return than bookstore buyback (10-20% of original price).	Pay close attention: Ensure posting process is simple and quick. Provide clear guidance on pricing. Make it easy to mark books as sold or delete listings.
Student Buyers	Students starting courses who need textbooks but want to save 30-70% compared to bookstore prices. They need an easy way to find books by course code.	Pay close attention: Make search functionality fast and accurate. Display clear book condition and pricing. Provide reliable seller contact information.
Instructor (Tim)	ENSE 281 course instructor who evaluates the project for educational outcomes and proper software engineering practices.	Meet requirements: Attend scheduled check-ins. Submit all deliverables on time. Demonstrate progress through GitHub commits. Address feedback on privacy and design.
University of Regina	The institution whose students will benefit from reduced textbook costs. Interested in student welfare and sustainability initiatives.	Provide information: Share project outcomes if successful. Demonstrate how the platform promotes sustainability and student savings.
Development Team	Thomas P., Chop Peter, David, and Shaikh - students building the platform as a course project while learning web development.	Pay close attention: Regular team meetings. Clear task assignments via RACI chart. GitHub for collaboration. Open communication about blockers and progress.
